Office Action Summary

Art Unit: 2837

1. The serial numbers of all the copending applications mentioned on pages one and two of the specification should be provided.
2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 20-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The nature of "expert data" and "expert music listener(s)" is relative in nature and cannot be fully construed.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-28 are rejected under 35 U.S.C. 102(a) as being fully met by either of Tsai or Tsurumi et al.

Art Unit: 2837

Each patent discloses a multimedia system wherein different categories of data are searched and identified. Particular selections within the categories are selected. An interface is provided.

7. Claims 1-28 are rejected under 35 U.S.C. 102(b) as being fully met by Contois.

Contois discloses an interface for a multimedia device. Selected categories of music such as jazz or classical music are searched and identified. Selected music is played from that category.
